Technical Skills

Front End Development: TypeScript, JavaScript, Angular, RxJS, HTML, CSS, SCSS, Tailwind CSS, Bootstrap

Backend & APIs: C#, ASP.NET, SQL, Firebase, Node.js, Python, Java

Frameworks: Familiar with React; Extensive experience with Angular and RESTful APIs

Testing: Jasmine, Jest, Karma; unit and integration test coverage

CI/CD & Tooling: Git, GitHub Actions, GitLab CI, Agile, Scrum

AI-Assisted Development: Claude Code, Cursor, and GitHub Copilot

Design Tools: Figma, Adobe Photoshop, Adobe Illustrator, Adobe XD

Work Experience

Software Engineer - Contract for Disney Experiences Technology, DCL

Korn Ferry | Celebration, FL | November 2024 – Present

Tech Stack: Angular, Typescript, Javascript, Node.js, SCSS, Figma, Git, Scrum, Unit Testing

- Implemented front-end features, enhancements, and components from design team specifications, ensuring clean and maintainable code.
- Collaborated cross-functionally with Product, Creative, and Technology partners to develop and deploy web applications.
- Developed technical documentation, protocols, and specifications for assigned components and projects.
- Recommended and implemented improvements to processes, technology, and team workflows, contributing to overall development effectiveness.
- Served as a technical resource for new team members during onboarding, providing guidance on codebase familiarization and issue resolution.
- Incorporate AI-assisted coding tools (Claude/Cursor/Github Copilot) into daily development workflow to speed up implementation, refactors, and code review.

Software Engineer - Product

Impartner Software | South Jordan, UT | August 2022 – November 2024

Tech Stack: Angular, Typescript, Node.js, Tailwind CSS, Figma, Git, CI/CD Pipelines, Agile, Unit Testing

- Developed customer-facing user interfaces using Angular, emphasizing clean and maintainable code adhering to team coding standards.
- Conducted code reviews and contributed to coding standards to ensure code quality and consistency within the team.
- Led the development of key features, promoting best practices in front-end development.
- Developed unit tests to ensure quality code, focusing on practical test scenarios rather than simple line coverage metrics.
- Built and deployed features through GitLab CI/CD pipelines as part of an Agile team workflow.

Software Engineer - Customer Implementation

Impartner Software | South Jordan, UT | May 2020 – August 2022

Tech Stack: Angular, Typescript, Javascript, C#, ASP.NET, Figma, Scrum

- Worked on implementing responsive web pages using JavaScript and CSS, focusing on creating user-friendly and visually appealing interfaces.

- Communicated effectively with cross-functional teams to articulate implementation details and collaborate on feature development.
- Served as a subject matter expert for technical aspects during customer calls, offering tailored solutions based on product capabilities.
- Analyzed existing processes to identify areas for improvement, implementing changes that optimized resource utilization and project timelines.

Solutions Architect

Impartner Software | South Jordan, UT | October 2018 – April 2020

Tech Stack: C#, ASP.NET, Javascript, Adobe Photoshop, Adobe Illustrator, Adobe XD, Scrum

- Identified custom development needs by listening to client requirements and proposing tailored software solutions.
- Worked closely with project management and development teams to monitor progress and ensure project alignment with set goals.
- Oversaw all aspects of design and development, providing innovative design solutions as needed.
- Conducted technical demonstrations to clients, assisting them in making informed decisions on implementing solutions.
- Enhanced product knowledge and skills in C# and JavaScript, further contributing to development efforts.

Investment Data Analyst

Vanguard | Scottsdale, AZ | July 2016 – September 2018

- Leveraged Microsoft Excel and SQL databases to compile comprehensive investment reports, monitoring market trends using Bloomberg and S&P.
- Collaborated with traders and portfolio managers to provide timely and accurate investment data analysis.

Projects

Fitness Tracker

Angular, TypeScript, RxJS, Angular Material, HTML, CSS, Firebase, Figma

- Built a full-stack application enabling users to log in and track their exercises, using Firebase for authentication and data storage.
- Redesigned the application layout from Angular Material standard design to a custom interface, enhancing the overall user experience.

Recipe Book

Angular, Typescript, RxJS, Bootstrap, HTML, CSS, Firebase, Figma

- Developed an application for users to save recipes and create shopping lists, integrating Firebase for data storage and user authentication.
- Enhanced the design beyond Bootstrap's standard, creating a unique and user-friendly interface.

Education

Bachelor of Science in Business Administration, Finance

Northern Arizona University | Flagstaff, AZ | August 2010 – June 2013
